

# LEGAL ACTION AGAINST 5G HELP US SECURE A SAFER FUTURE

**GROUPS OF INDIVIDUALS ACROSS THE UK, INCLUDING DOCTORS AND SCIENTISTS, HAVE JOINED FORCES TO BRING LEGAL ACTION AGAINST THE IMPOSITION OF 5G.**

The UK government has failed to take sufficient notice of clearly identified health and safety risks of wireless radiation and the increased exposure from radio frequency radiation. The risks are foreseeable and preventable. Current guidelines continue to ignore the biological impact of low-intensity EMF exposure, and recognize only thermal (heating) effects. The case concerns defending our fundamental right to privacy and protection from what is medically termed 'human subjects experimentation'.

Case led by  
**Michael Mansfield  
QC, "the king of  
human rights work"  
(the Legal 500)**

Michael Mansfield represented the families of Grenfell Tower, Lockerbie, the Ballymurphy Massacre and Stephen Lawrence.

**We are not** opposed to technology

**We are** opposed to untested technology

**We want** safe technology

*Life Lovers I believe this is one of the most important legal cases in history for the health of all living things. Michael Mansfield QC thinks so too. We deserve due diligence from our gov't and they are nowhere near it.*

**Jerome Flynn from Game of Thrones**
